

**Amendments to the Specification:**

Please add the following new paragraph immediately after paragraph [0009]:

[0009.1] FIG. 3 is a block diagram showing interface 106 being coupled to an external device 107 through a network 301.

Please replace paragraph [0012] with the following replacement paragraph:

[0012] The interface 106 may be any type of communication interface capable of communicating with an external device 107. For example, the interface 106 may be a modem that communicates over a standard public switched telephone network (PSTN). Alternatively, the interface 106 may be a network card that enables the electronic information retrieval device 100 to communicate with other computers or computer devices. The communication may be over a computer network 301, such as a LAN, a WAN, a VPN, or the Internet, for example. In addition, the interface 106 may communicate in a wireless fashion with other wireless devices, such as with a cellular or satellite telephone network, for example. In addition, the interface 106 may be a television interface, such as a television receiver. Alternatively, the interface 106 may be a cable television interface capable of sending and/or receiving data over a television cable.
